

German Ice Report - No. 25

2013-02-07

Southern Baltic Sea

On the southern Peenestrom there is new ice and ice formation, in places. In the Kleines Haff there is very open thin brash ice at the northern coast and minor new ice.

Outlook

At air temperatures around the freezing point marginal new ice formation is possible in sheltered coastal regions. Towards the weekend the possibility of ice formation will increase.

Restrictions to navigation

From 24.01.2013 18:00: Northern approach to Stralsund (including Bodden waters south of Darß and Zingst), southern Peenestrom and Kleines Haff are closed for navigation.

From 25.01.2013 00:00: Only daytime navigation is allowed in the eastern approach to Stralsund and in approaches to Wolgast as well as to the harbours in Greifswalder Bodden.
