

German Ice Report - No. 31

2013-02-13

BB 11000
CC 11000

North Sea

On the North-Frisian coast there is close new ice in the harbour of Tönning.

Western Baltic Sea

On the inner Schlei and in the harbours of Wismar and Rostock there is new ice, in places. New ice occurs near the coasts of the Bodden waters south of Darß and Zingst.

Southern Baltic Sea

In the Bodden waters between Hiddensee and Rügen there is very close to very open new ice in the sheltered bays. In the marginal areas of the Greifswalder Bodden and on the southern Peenestrom there is new ice and ice formation. On the northern Peenestrom new ice and shuga occurs, in places. In the Kleines Haff there is thin brash ice frozen with new ice at the northern coast, else new ice and ice formation.

Outlook

At daily air temperatures around the freezing point, light frost degrees at night, and weak winds from different directions, no major ice formation will occur during the next four to five days.

Restrictions to navigation

From 07.02.2013 18:00: Only daytime navigation is allowed in the northern approach to Stralsund (including Bodden waters south of Darß and Zingst), in the southern Peenestrom and in Kleines Haff.

Information about the begin and end of daytime navigation can be obtained at Traffic Service Centre Warnemünde on VHF (Stralsund Traffic Channel 67 and Wolgast Traffic Channel 09) or on phone (no. 0381/20671843 and 0381/20671844).
