

## **German Ice Report - No. 09**

2017-01-27

AA 3//// 4////

BB 2////

The ice situation is virtually unchanged.

### **Western Baltic Sea**

In the port of Schleswig, thin new ice occurs up to Mövenberg. The port of Wismar is ice free.

### **Southern Baltic Sea**

The southern Peene Strait is mostly covered by close to very close 5-11 cm thick ice south of Wolgast and in the Szczecin Lagoon there is open water and very open to very close ice in places, up to 10 cm thick.

### **Outlook**

Over the weekend, there will be light to moderate frost. Hence, new ice formation is likely in sheltered areas of the German Baltic Sea coast.
