

German Ice Report - No. 13

2017-02-02

AA 1//// 2//// 3//// 4////

BB 1//// 2////

The ice situation is virtually unchanged.

Southern Baltic Sea

In the Bodden of Darß-Zingst, open to close new ice occurs in places. Little new ice is present in Neuendorf. In Greifswald-Wiek and in the Dänische Wiek, very open to very close thin ice occurs. The southern Peene Strait is partly covered by very close, 3-12 cm thick ice south of Wolgast but there are also areas with open water. In the Szczecin Lagoon there is open to very close ice, up to 10 cm thick.

Outlook

Temperatures will increase to 0-3°C and the ice will melt slowly..
