

German Ice Report - No. 07

2018-02-26

CC 13001
FF 10//0

The ice coverage is increasing.

North Sea

In Dagebüll very open new ice has formed.

Western Baltic Sea

The harbor of Schleswig is covered by very open new ice and in the harbor of Wismar there is close new ice.

Southern Baltic Sea

From the harbour of Rostock to Warnemünde open to close new ice has formed. The Darß-Zingster Bodden chain is locally covered by very open to close new ice or thin level ice. In the area around Rügen very open to open new ice or thin ice occur in Greifswald-Wiek and Dänische Wiek as well as in Neuendorf and Kloster. In some shallow and sheltered harbours there may also be some new ice. The southern Peene Strait is mostly covered by close to very close new ice south of Wolgast. In the Szczecin Lagoon very close new ice has formed locally.

Outlook

Having light frost all day long there will be further ice growth locally.
