

German Ice Report - No. 08
2018-02-27

AA 35060
BB 15060 25060
CC 14021

The ice coverage is increasing.

North Sea

There is open water around Sylt. In Dagebüll harbour open and on the fairway very open new ice has formed. On the Weser there is open water.

Western Baltic Sea

The harbour of Schleswig is covered by very open new ice and in the harbour of Wismar there is close new ice.

Southern Baltic Sea

From the harbour of Rostock to Warnemünde close to very close new ice has formed. The Darß-Zingster Bodden chain is covered by close to very close new ice or thin level ice and open water. Between Rügen and Hiddensee open to very close, partly rafted new ice or thin ice occurs. In the Strelasund open water can be found locally. In the Greifswalder Bodden there is open to close ice in Greifswald-Wiek and Dänische Wiek. In the harbours Ladebow and Thiessow open to very close new ice occur. On the fairway to Greifswalder Bodden, around Osttief, there is very close new ice. The Peene Strait is covered by very close and very open new ice. In the Szczecin Lagoon mostly very close new ice or thin level ice occurs.

Outlook

There will be further ice growth and westward ice drift.
