North Sea coast

New ice is present in places in the Wadden sea. At Listertief 15cm thick open ice. In the northfrisian ports there is mostly 2-10cm thick very open ice but also 15cm thick close ice in Tönning harbour. Open water with new ice is present on the Ems and Weser.

Western Baltic Sea

On the Schlei there is open 5-10cm thick ice. New ice is present in several harbours west of Rostock. In the bodden waters south of Darß and Zingst and in inner areas around Rügen : there is mostly 15cm thick fast and close ice. At the coast of Zingst there is open water.

Southern Baltic Sea

At Stralsund there is 10cm thick close ice and further out on the fairway, up to Osttief and Landtief, there is very open to open, up to 10cm thick ice. At the coast of the Greifswalder Bodden there is 5-15cm thick compact ice in sheltered areas and 3-10cm very open to close ice further out. On the Peenestrom and in the Kleines Hafft here is mostly up to 15cm thick fast or very close ice.

Outlook

Further ice formation is expected the coming days.
