North Sea coast

New ice is present in the Wadden sea. At Listertief 15cm thick, open ice. In the northfrisian ports there is up to 15cm thick, open to close ice. On the Elbe close new ice at Stadersand. Open water with new ice is present on the Ems and Weser.

Western Baltic Sea

On the Schlei there is open 5-10cm thick ice. New ice is present in several harbours west of Rostock. In the bodden waters south of Darß and Zingst and in inner areas around Rügen there is up to 15cm thick fast and close ice.

Southern Baltic Sea

At Stralsund there is 10cm thick very close ice and further out on the fairway, up to Osttief and Landtief, there is 5-15cm thick open ice. At the coast of the Greifswalder Bodden there is 5-15cm thick compact ice in sheltered areas and 5-15cm thick open to close ice further out. On the Peenestrom and in the Kleines Hafft there is up to 15cm thick fast or very close ice. At sea outside of Usedom there is drifting new ice.

Outlook

Further ice formation is expected the coming days.
