### **North Sea coast**

Open water with areas of 5-10cm thick close ice in the Wadden sea. At Listertief 15cm thick close ice. In the northfrisian ports there is up to 15cm thick, open to very close ice. On the Elbe open water and open newice from Hamburg to Stadersand. Open water with areas of 5-10cm thick very open ice is present on the Ems and Weser.

### **Western Baltic Sea**

In ports and sheltered areas from Flensburg to Lübeck there is very open to close new ice. On the Schlei there is open 5-10cm thick ice. At Wismar 5-10cm thick, close ice. At and outside Rostock port there is open water to close new ice.

In the bodden waters south of Darß and Zingst and in inner areas around Rügen there is up to 20cm thick fast and close ice.

### **Southern Baltic Sea**

At Stralsund there is 10cm thick ver close ice and further out on the fairway, up to Osttief and Landtief, there is 5-15cm thick open ice. At the coast of the Greifswalder Bodden there is 5-20cm thick compact ice in sheltered areas and 5-15cm thick very open to close ice further out. On the Peenestrom and in the Kleines Hafft there is up to 20cm thick fast or very close ice. At sea outside of Usedom there is drifting new ice.

### **Outlook**

Further ice formation is expected the coming days.
