Übersicht

In der nördlichen Bottenwiek liegt in den Schären 15–30 cm dickes Festeis und weiter außerhalb treibt zumeist dichtes, 5–15 cm dickes Eis. In der südlichen Bottenwiek und Norra Kvarken liegt in den Schären bis zu 30 cm dickes Festeis und weiter außerhalb kommt lockeres bis dichtes Treibeis vor. Auf See treibt in Norra Kvarken sehr lockeres Eis. Entlang der Küsten der Bottensee, dem Schärenmeer und der Ålandsee liegt Festeis, dünnes ebenes Eis oder Neueis. Im Finnischen Meerbusen liegt entlang der Nordküste dünnes, ebenes Eis. Im Osten kommt bis zu 25 cm dickes Festeis und auf See bis 10 cm dickes Treibeis vor. Im Rigaischen Meerbusen befindet sich Neueis und bis zu 25 cm dickes Eis im Moonsund und in der Pärnubucht. Neueis oder dünnes, ebenes Eis kommt in der nördlichen Ostsee, den Haffgebieten der südöstlichen Ostsee und dem Vänern vor. Neueis kommt in geschützten Buchten der zentralen Ostsee, der südlichen Ostsee, der westlichen Ostsee, in Bereich Belte und Sund, dem Kattegat und dem Skagerrak vor.

Overview

In the northern Bay of Bothnia, there is 15–30 cm thick fast ice in the archipelagos, and mostly close, 5–15 cm thick drift ice further out. In the southern Bay of Bothnia and Norra Kvarken, there is up to 30 cm thick fast ice in the archipelagos and very open to open drift ice further out. There is very open drift ice at sea in Norra Kvarken. Along the coasts of the Sea of Bothnia, the Archipelago Sea and Åland Sea, there is fast ice, thin level ice or new ice. In the Gulf of Finland, thin level ice is present along the northern coast. In the eastern part, there is up to 25 cm thick fast ice and up to 10 cm thick drift ice at sea. In the Gulf of Riga, there is new ice and up to 25 cm thick ice in Moonsund and Pärnu Bay. New ice and thin level ice occurs at places in the northern Baltic, in the lagoons of the southeastern Baltic and Lake Vänern. New ice occurs in sheltered areas of the central Baltic, the southern Baltic, the western Baltic, in the Belts and Sound, Kattegat and Skagerrak.

Bay of Bothnia

In the archipelagos of the northern Bay of Bothnia, there is 15–30 cm thick fast ice, from the Finnish coast reaching out to Hebe-3 and Kattilankalla. Off the fast ice, there is 5–15 cm thick, close drift ice to Nordströmsgrund in the west and in the east to 8 sm west of Oulu-1 – Nahkiainen. In the southern

Bay of Bothnia, there is 10–25 cm thick fast ice in the archipelagos and thin open to close drift ice further out.

Ice formation and ice growth is expected the coming day. The ice is drifting to the north/northeast.

 E-Mail: ice@bsh.de

Norra Kvarken

In the archipelagoes off Vaasa, there is 10–30 cm thick fast ice out to Storhästen with 5–15 cm thick, compact ice out to Norra Globsten. New ice and ice formation follows to Vaasa lighthouse. Along the Swedish coast, there is 5-20 cm thick fast in

the inner archipelagos. North of Nordvalen, there is very open ice at sea.

Some ice growth and ice drift to the north/northeast is expected the coming day.

Sea of Bothnia

On Ångermanälven, there is 10–25 cm thick fast ice in the upper part and thin level ice and new ice in the lower part. Else, there is 10–20 cm fast ice or thin level ice in the archipelagos and bays. Further out along the Finnish coast, there is a thin belt

of 3–10 cm thick, very close drift ice in the north and open drift ice in the south.

Some ice growth and ice formation along the northern Swedish coast is expected, else no larger changes.

Archipelago and Åland Sea

Thin level ice is present in places along the eastern coast. Else, there is new ice in the archipel-

gos and along the western coast.
No larger changes are expected.

Gulf of Finland

From St. Petersburg up to the dike, there is 15–25 cm thick fast ice. Farther out, there is very close, 5–20 cm thick ice to Šepelevskij. In the Bay of Vyborg, there is 15–25 cm fast ice. 5–15 cm very close ice or fast ice is present in the Bjerkesund. In the archipelagoes of the northern coast, there is 5–20 cm thick level ice or fast ice. Further out to the line Haapasaari – Nerva, there is 3–10 cm thick,

close ice. East of the longitude of the island Moščnyj, there is very open ice. At the southern coast, new ice is present in places near the shore. In Lake Saimaa and the Saimaa Canal, there is 10–25 cm thick ice.

Some new ice formation and ice growth is expected the coming days and the ice will drift to the north.

Gulf of Riga

In Moonsund, there is very close, 10–25 cm thick ice near the coasts and new ice in the central part. New ice occurs south of Saaremaa. Along the northeastern coast to Kihnu, there is very close ice. In Pärnu Bay, there is 10–25 cm thick very

close ice or thin level ice to Kihnu. In the port of Riga, there is open water with some thicker drift ice.

Some ice growth is expected. Ice drift is to the north.

Northern Baltic

In Lake Mälaren, there is 5–20 cm thick fast ice or level ice in the western part. In sheltered bays further east, there is thin level or new ice. Along

the Swedish coast, there is new ice or shuga in some sheltered bays.

No larger changes are expected.

Central Baltic

New ice occurs in sheltered bays along the Swedish coast. Strings of shuga occur in the Kalmar-sund.

Almost unchanged conditions are expected the coming day.

Southeastern Baltic

The Curonian Lagoon is covered by new ice and in the Vistula Lagoon, there are areas with up to 8cm

thick ice in the southern part.

No larger changes are expected the coming day.

Southern Baltic

New ice occurs in the Szczecin Lagoon, along the river Peene and in sheltered bays of the Bay of Greifswald. New ice is also present along the

Swedish coast off Karlshamn.

Almost unchanged conditions but ice melting is expected with coming warmer temperatures.

Western Baltic

New ice occurs in some shelters areas, inside the Darss-Zigst Bodden Chain and the Bodden waters

around Rügen.

Ice melt continues the coming days.

Belts and Sound

New ice occurs in a few places.

Ice melt continues the coming days.

Skagerrak und Kattegat

In some inner fjords of the Skagerrak, there is fast ice up to 30 cm thick. Else, new ice occurs in a few sheltered places.

Ice melt continues in the Kattegat. Some ice formation and growth is expected in sheltered places in Skagerrak.

Swedish Lakes

New ice as well as 5–15 cm thick level ice is present in sheltered bays of Lake Vänern.

No larger changes the coming day.

Dr. W. Aldenhoff

Information of the Icebreaker Services

Estonia

Icebreaker: EVA-316 assists to the port of Pärnu.

Finland/Sweden

Vessels bound for Gulf of Bothnia ports in which assistance restrictions apply, shall when passing latitude 60° 00' N report their nationality, name, destination, ETA and speed to ICE INFO on VHF channel 78. This report can also be given directly by telephone to +46 10 492 7600.

Vessels bound for Finnish or Swedish ports with assistance restrictions in the Quark or the Bay of Bothnia shall, 20 nautical miles before Nordvalen Lighthouse (63° 32.15' N 20° 46.60' E), report in accordance with the instructions for winter navigation to Bothnia VTS on VHF channel 67.

Icebreakers:

OTSO, KONTIO, FREJ, ALE and YMER assist in the Bay of Bothnia. VOIMA assists in the eastern Gulf of Finland. PROTECTOR and CALYPSO assist in the northern Lake Saimaa. METEOR assists in the southern Lake Saimaa and the Saimaa Canal.

Russia

There are restrictions for small crafts going to Vysotsk, Vyborg, St. Petersburg, Ust-Luga and Primorsk.

There is a requirement of ice class Ice 1 or icebreaker assistance to Vyborg from 30.12., Ust-Luga from 04.01.2022 and Primorsk from 12.01.2022. Icebreaker assistance is required for vessels without ice reinforcement to St. Petersburg from 31.12.

Icebreakers: Several icebreakers assist vessels to the port of Vyborg, Vysotsk, Primorsk, Ust-Luga and St. Petersburg.

Baltic Sea Ice Code

First number:

A_b Amount and arrangements of sea ice

- 0 Ice free
- 1 Open water – concentration less than 1/10
- 2 Very open ice - concentration 1/10 to 3/10
- 3 Open ice – concentration 4/10 to 6/10
- 4 Close ice – concentration 7/10 to 8/10
- 5 Very close ice – concentration 9/10 to 9+/10
- 6 Compact ice, including consolidated ice – concentration 10/10
- 7 Fast ice with drift ice outside
- 8 Fast ice
- 9 Lead in very close or compact drift ice or along the fast ice edge
- / Unable to report

Third number:

T_b Topography or form of ice

- 0 Pancake ice, ice cakes, brash ice – less than 20 m across
- 1 Small ice floes – 20 to 100 m across
- 2 Medium ice floes – 100 to 500 m
- 3 Big ice floes – 500 to 2000 m across
- 4 Vast or giant ice floes – more than 2000 m across – or level ice
- 5 Rafted ice
- 6 Compact slush or shuga, or compacted brash ice
- 7 Hummocked or ridged ice
- 8 Thaw holes or many puddles on the ice
- 9 Rotten ice
- / No information or unable to report

Second number:

S_b Stage of ice development

- 0 New ice or dark nilas (less than 5 cm thick)
- 1 Light nilas (5 - 10 cm thick) or ice rind
- 2 Grey ice (10 - 15 cm thick)
- 3 Grey-white ice (15 - 30 cm thick)
- 4 White ice, first stage (30 - 50 cm thick)
- 5 White ice, second stage (50 - 70 cm thick)
- 6 Medium first year ice (70 - 120 cm thick)
- 7 Ice predominantly thinner than 15 cm with some thicker ice
- 8 Ice predominantly grey-white ice (15 – 30 cm) with some thicker ice
- 9 Ice predominantly thicker than 30 cm with some thinner ice
- / No information or unable to report

Fourth number:

K_b Navigation conditions in ice

- 0 Navigation unobscured
- 1 Navigation difficult or dangerous for wooden vessels without ice sheathing
- 2 Navigation difficult for unstrengthened or low-powered vessels built of iron or steel. Navigation for wooden vessels even with ice sheathing not advisable
- 3 Navigation without icebreaker assistance possible only for high-powered vessels of strong construction and suitable for navigation in ice
- 4 Navigation proceeds in lead or broken ice-channel without the assistance of an icebreaker
- 5 Icebreaker assistance can only be given to vessels suitable for navigation in ice and of special size
- 6 Icebreaker assistance can only be given to vessels of special ice class and of special size
- 7 Icebreaker assistance can only be given to vessels after special permission
- 8 Navigation temporarily closed
- 9 Navigation has ceased
- / Unknown
