

German Ice Report - No. 06

2022-12-21

AA 14000

BB 14000 20//0

CC 11000

Western Baltic Sea

At Wismar and Rostock, there is open water in places. On the Schlei there is about 5 thick rotten level ice at Schleswig, decreasing to open water towards Kappeln. In the Bodden waters south of Darß and Zingst and in the inner areas around Rügen there is rotten level ice with areas of open water.

Southern Baltic Sea

In the Strelasund there is rotten, very close thin ice. At the coast of the Greifswalder Bodden there is rotten level ice in some sheltered areas along the coast. The Peenestrom and the Kleines Haff are covered by rotten new ice with some areas of open water.

Outlook

The ice will melt further.
