

German Ice Report - No. 02
2025-02-20

BB 14101
CC 13000
DD 12000

North Sea coast

In the Northfrisian Wadden sea there is open water with thin ice present in some harbours.

Western Baltic Sea

In sheltered areas from Flensburg to Rostock, there is open water with new ice in places. On the Schlei there is open new ice. In the Bodden waters south of Darss and Zingst new ice is present. In sheltered places around Ruegen and out to Hiddensee there is new ice of varying concentration

Southern Baltic Sea

On the Peenestrom there is thin ice with varying concentration. In the western part of the Szczecin Lagoon, there is mostly open ice, partly thicker than 5 cm.

Outlook

Temperatures will raise above 0 °C from the west during the day, so the ice will start to melt. In the eastern part the melt will be slower with some night frost.
