Übersicht

In der Bottenwiek liegt in den nördlichen Schären 20–70 cm dickes Festeis und in den südlichen Schären bis 40 cm dickes Festeis. Auf See treibt im Nordosten bis 60 cm dickes, sehr dichtes, teilweise aufgeschobenes oder aufgepresstes Eis. Das Eis ist örtlich schwer zu passieren. Ansonsten befindet sich auf See offenes Wasser. In Norra Kvarken liegt bis 45 cm dickes, morsches Festeis in den Schären. Auf See ist es eisfrei. In der nördlichen Bottensee kommt entlang der Küste meist morsches Festeis vor. Im Süden ist es eisfrei. Im östlichen Finnischen Meerbusen kommt im Osten und Nordosten örtlich morsches Festeis vor.

Overview

In the Bay of Bothnia, there is 20–70 cm thick fast ice in the northern archipelagos and up to 40 cm thick fast ice in the southern archipelagos. At sea in the northeast, there is up to 60 cm thick, very close and partly ridged and rafted ice. The ice field is at places difficult to force. Else at sea is open water. In the Quark, there is up to 45 cm rotting fast ice in the inner archipelagos. The sea is ice-free. Along the coast of the northern Sea of Bothnia there is mostly rotten fast ice in inner bays. Along the southern coast it is ice-free. At the eastern and north-eastern coast of the Gulf of Finland, there is rotten ice in sheltered areas.

Bay of Bothnia

In the northern Bay of Bothnia, there is 20–70 cm thick fast ice to Kemi 3 and Oulu 3 in the east. At sea east of about the line Farstugrunden – Kalajoki, there is 10–60 cm thick, ridged and rafted, very close ice. The ice field is in places difficult to force and pressure occurs in the ice field. At the ice edge is a brash ice barrier. Else at sea there is

open water. In the southern Bay of Bothnia, there is up to 40 cm thick fast ice in the archipelagos and very open ice and open water further out. The sea is ice-free.

With southwesterly winds and air temperatures above 0 °C the ice will drift to the northeast and slow ice melt will continue over the weekend.

The Quark

In the Vaasa archipelago there is 20–45 cm thick rotting fast ice to east of Ensten. Along the Swedish coast there is 15–35 cm fast ice in bays. Fur-

ther out is open water. The sea is ice-free.

With air temperatures above 0 °C ice melt will continue over the weekend.

Sea of Bothnia

In the east the ice along the northern coast is getting rotten and south of Pori it is mainly ice-free. In the west, there is up to 30 cm thick fast ice in sheltered places north of Sundsvall. On Ångermanäl-

ven there is 10–40 cm thick fast ice. Further south to Söderhamn is rotten ice in sheltered places. With air temperatures above 0 °C ice melt will continue over the weekend.

Gulf of Finland

From St Petersburg to the dike, there is open ice in the fairway and along the coast rotten fast ice. Further westwards there is mostly very close thin ice up to the westernmost tip of Kotlin. In Vyborg Bay there is rotten fast ice and open water in the

entrance. In the eastern part of the northern coast, there is rotten fast ice. With air temperatures above 0 °C and maximum day temperatures above 5 °C the ice melt will continue over the weekend.

X. Lange

Finland/Sweden

Vessels bound for Gulf of Bothnia ports in which assistance restrictions apply, shall when passing latitude 60° 00' N report their nationality, name, destination, ETA and speed to ICE INFO on VHF channel 82. This report can also be given directly by telephone to +46 10 492 7600.

Vessels bound for Finnish or Swedish ports with assistance restrictions in the Quark or the Bay of Bothnia shall, 20 nautical miles before Nordvalen Lighthouse (63° 32.15' N 20° 46.60' E), report in accordance with the instructions for winter navigation to Bothnia VTS on VHF channel 67.

The traffic separation scheme in the Quark has been taken in use again.

Icebreakers: YMER, IDUN, KONTIO, OTSO, SISU, ZEUS and POLARIS assist in the Bay of Bothnia.

Russia

Icebreakers: MUDJUG assists vessels to the port of St. Petersburg. K. IZMAYLOV assists to Vyborg and Vysotsk.

Baltic Sea Ice Code

First number: A_B Amount and arrangements of sea ice 0 Ice free 1 Open water – concentration less than 1/10 2 Very open ice - concentration 1/10 to 3/10 3 Open ice – concentration 4/10 to 6/10 4 Close ice – concentration 7/10 to 8/10 5 Very close ice – concentration 9/10 to 9+/10 6 Compact ice, including consolidated ice – concentration 10/10 7 Fast ice with drift ice outside 8 Fast ice 9 Lead in very close or compact drift ice or along the fast ice edge / Unable to report Third number: T_B Topography or form of ice 0 Pancake ice, ice cakes, brash ice – less than 20 m across 1 Small ice floes – 20 to 100 m across 2 Medium ice floes – 100 to 500 m 3 Big ice floes – 500 to 2000 m across 4 Vast or giant ice floes – more than 2000 m across – or level ice 5 Rafted ice 6 Compact slush or shuga, or compacted brash ice 7 Hummocked or ridged ice 8 Thaw holes or many puddles on the ice 9 Rotten ice / No information or unable to report	Second number: S_B Stage of ice development 0 New ice or dark nilas (less than 5 cm thick) 1 Light nilas (5 - 10 cm thick) or ice rind 2 Grey ice (10 - 15 cm thick) 3 Grey-white ice (15 - 30 cm thick) 4 White ice, first stage (30 - 50 cm thick) 5 White ice, second stage (50 - 70 cm thick) 6 Medium first year ice (70 - 120 cm thick) 7 Ice predominantly thinner than 15 cm with some thicker ice 8 Ice predominantly grey-white ice (15 – 30 cm) with some thicker ice 9 Ice predominantly thicker than 30 cm with some thinner ice / No information or unable to report Fourth number: K_B Navigation conditions in ice 0 Navigation unobscured 1 Navigation difficult or dangerous for wooden vessels without ice sheathing 2 Navigation difficult for unstrengthened or low-powered vessels built of iron or steel. Navigation for wooden vessels even with ice sheathing not advisable 3 Navigation without icebreaker assistance possible only for high-powered vessels of strong construction and suitable for navigation in ice 4 Navigation proceeds in lead or broken ice-channel without the assistance of an icebreaker 5 Icebreaker assistance can only be given to vessels suitable for navigation in ice and of special size 6 Icebreaker assistance can only be given to vessels of special ice class and of special size 7 Icebreaker assistance can only be given to vessels after special permission 8 Navigation temporarily closed 9 Navigation has ceased / Unknown
